A history of passion and technology

SCAGLIA GROUP of today was born in 1838, when we started to manufacture wooden bobbins for the textile industry. From this distant beginning, we have grown into a diverse group of companies providing a wide range of products and solutions. We continue to support the textile industry through **SCAGLIA Srl** now using modern materials including polymers and light alloys. Power transmission components and motion control solutions come from

SIT SpA and **SIT Automation. ELATECH Srl** is responsible for the design and manufacture of polyurethane belts. In 2004 the materials handling and industrial manipulator interests were brought together under the **INDEVA** banner.

Scaglia

Accessories for textile machines

Group's historical company, SCAGLIA Srl is a **worldwide highly recognized brand** for their textile machinery accessories. The company manufactures spools and tubes made of light alloys and plastics. Very **active in research and development** and owner of numerous patents, in recent years SCAGLIA has developed an innovative friction welding system for welding metals different from each other.

Thanks to this technology, SCAGLIA is emerging as favored supplier of upscale products for automotive companies and industrial frontier goods producers.

SCAGLIA srl, established in 1838, is the **world leader in production of textile accessories**, including aluminium and plastic alloy yarn carriers such as flanged bobbins, tubes, cylinders and cones. The range of products also includes yarn waste removing machines, as well as a **service division for the sale of spare parts** (mechanical and electrical components) and assistance suitable for Tsudakoma® air/water jet looms.

SIT

The Power Transmission Company

SIT SpA has 45 years history dedicated to power transmission products. This experience fuels innovative design and high quality reliable products confirmed by our ISO 9001, ATEX and ROHS certification. With its winning **mix of human creativity and technology** SIT is recognized worldwide as an industry leader. With its **worldwide distribution network**, SIT is able to offer customers technical assistance and consultation, a full stock range and **quick yet precise service**.

SIT SpA, since 1968, manufactures and sells the widest range of **belts and pulleys** for friction and synchronous drives, keyless self locking units, gear and **backlash couplings** and motor bases, standard and according to customer specifications.

Elatech

Polyurethane Belts

ELATECH srl is a Company fully dedicated to the research, development and manufacture of polyurethane belts for industrial applications. The **unique manufacturing processes**, realized with the newest generation technologies, modern and efficient test and control equipment and a **unique team of qualified technicians and engineers**, allow ELATECH to offer superior products and highly flexible service. Meeting the highest standards in terms of tolerance, performance and durability, ELATECH's Polyurethane Belts find a **wide range of applications** in different fields of industry, both for conveying, lifting and power transmission.

Ranging from long length open end rolls to welded or ELA-flex SD™ truly endless timing belts and iSync™ sleeves, and complemented by a wide choice of mechanical joints, false teeth, backings, cleats and other accessories, ELATECH's Polyurethane Belts provide the most extensive offer available on the market.

Indeva

Intelligent Devices for Handling and Lean Manufacturing solutions

SCAGLIA INDEVA SpA is a market leader in the development, design and manufacture of Intelligent Devices for Handling and Lean Manufacturing solutions. Our Company mission is simple and effective: to provide our Customers with safe, ergonomically sound solutions to **increase productivity and quality of production.**

SCAGLIA INDEVA has **wide experience in all industry sectors** and especially Automotive, Aerospace, Pharmaceutical, Engineering and Food and Drink. Our design department brings together our advanced control systems and **custom made gripping systems** to meet all aspects of product manipulation and work cycle demands. We aim to provide an answer that is as close as possible to the "human" solution.

With an increasing international network of subsidiaries and qualified distributors, SCAGLIA INDEVA can support both local requirements and those from customers operating on a global basis. SCAGLIA INDEVA also designs, manufactures and delivers **modular structures made with INDEVA LEAN SYSTEM® components and AGV based solutions.** Together with our Intelligent Devices for Handling, SCAGLIA INDEVA can provide the complete answer for **Lean Manufacturing applications.**

SIT Automation

Automation and Robotics

SIT Automation S.r.l. was born to meet the Italian and global market request of a reliable supplier of excellent solutions and products for mechatronics applications.

Thanks to years of experience in motion and automation fields, our team offers customers a solid support in designing and building innovative and competitive industrial automation systems, taking care of:

- Feasibility study of the automation system
- Solution proposal after analysis of machine cycle and dynamics
- Technical assistance during system start-up
- Personnel training

SIT Automation aims to provide machine builders and system integrators a complete, customized and well-tested solution, meeting design specification with an optimal cost-performance balance.

Our on-site warehouse is full of ready-to-ship components from our trusted suppliers. We are Italian official distributor of Delta Electronics, an important Taiwan-based multinational company that offers a wide range of industrial products like servo-systems, inverters, PLCs and touch panels. One of our partner is Trio Motion Technology, from U.K., which provides one of the most flexible and powerful EtherCAT controller module on the market.

We are also distributors of Schaffner, worldwide leader in solutions for electromagnetic compatibility, and IC Electronic, a Danish company focused on soft starter and static relays.

Thanks to the recent agreements with Japanese company Nidec-Shimpo we complete the range of the offer with their excellent planetary gearboxes.
